

ABSTRACT

The invention relates to methods for treating or preventing acute and/or chronic arthritis.

5 The method comprises administering to patients in need thereof therapeutically effective amounts of a TNF binding protein and methotrexate (N-[4-[[2,4-diamino-6-pteridinyl)methylamino]benzoyl]-L-glutamic acid). In a preferred embodiment, the TNF binding protein is 10 STNFR-I or STNFR-II. The invention also relates to pharmaceutical compositions containing a TNF binding protein and methotrexate useful in such methods.
